

Dr. David Bravo

Chief Science Officer at Nutreco

Dr. David M. Bravo is a seasoned industry leader with extensive experience in product creation and development. He is also a senior scientist with over 100 peer-reviewed papers, with research focus on the impact on physiology and production animal health and performance of ultra-specialty ingredients (e.g., phytotechnologies).

David holds two M.Sc. and a Ph.D. (nutrition; molecular and cellular nutrition), and he is a Harvard University alumnus. After graduation, he

was joined InVivo NSA (now known as Neovia) where he conducted research and expertise on ruminants and poultry. In 2006, he was recruited as R&D director of the feed additive company Pancosma. He created the R&D department and was, later, appointed Chief Innovation Officer. In 2018, he joined Land O'Lakes business unit feed to be Director for Innovation and Technology Scouting. Since 2021, David has been Chief Science Officer at Nutreco where he is head of the product development group called Nutreco Exploration.

David's passion lies in leveraging the power of large companies and working with leaders to embrace complexity, transformation, and establishing a corporate exploration mindset.
