

## Ranjith Mukundan

CEO, Managing Director & Co-founder,  
Stellapps Technologies

**As the CEO of Stellapps, Ranjith Mukundan has spent the last 10 years innovating and deploying Internet of Things (IoT) solutions and frameworks for digitising the dairy industry across India and providing technology and data-led premium market linkages to small holder dairy farmers.**

He is currently focused on scaling the organisation and streamlining the execution to keep pace with the increasing market traction. His vision is to unlock unprecedented value across the dairy supply chain via farm-to-fridge digitisation of the largest 'crop' on

the planet. He believes that the modular farm-to-consumer smartMoo IoT platform can help unleash this value for all the stakeholders in the dairy ecosystem – including alternate credit scores and data-led insurance underwriting mechanisms for small holder dairy farmers. Mukundan has more than 24 years of software industry experience and was formerly the global head of Wipro's Telecom Value Added Services Practice. Having delivered solutions for global clientele across the United States and Europe such as Microsoft, AT&T, Nortel, Ericsson, British Telecom etc., he did his Bachelors in Electronics and Communications Engineering, and MS from Illinois Institute of Technology, Chicago, in Telecom & Software Engineering.
